

BARRETT ENGINEERING STEEL

**The UK and Irelands largest
independent supplier of
Engineering Bar**

www.barrettsteel.com

Who we are

Barrett Engineering Steel are specialist suppliers of a wide range of black and bright carbon and alloys, forged bar, oil and gas grades and stainless-steel products with over 15,000 tonnes of stock. We're able to offer a variety of processing services including, cutting, peeling and grinding, boring, heat treatment, testing and machining.

We are established suppliers to several leading OEMs. Covering a wide range of sectors including mining, oil and gas, yellow goods, off highway and automotive products.

Our commitment to you

Barrett Engineering Steel prides itself on exceptional customer service. We're always looking to improve our performance on 5 key points:

• **Product quality** • **Specification** • **Processing** • **Packaging** • **Delivery**

We strive to work seamlessly in partnership with our customers, with dedicated Account Managers who have the industry experience and technical knowledge to meet all your requirements. We have a comprehensive Quality Management System, overseen by our Group Managing Director, which is regularly reviewed by internal and independent assessors so you can be assured your project is in safe hands.

Expansive delivery network

We provide a prompt and reliable delivery service across the UK and Ireland using our own modern transport fleet of over 160 vehicles. Barrett Engineering Steel has 6 sites in the UK that service all our customers' requirements both at home and overseas. We have over 150 years of steel stockholding experience and draw on our extensive supply chain network to ensure no matter your location we can support you.

Our processing and investment

Barrett Engineering Steel understand our customers have constantly evolving needs and our on going investment programme ensures we have the products and services to match them. Recent investments include,

- **Kasto Circular Saw** fully automated with cutting capabilities of up to 155mm dia. operational 24 hours a day at our site in Maghaberry, Northern Ireland.
- 1,400 tonnes of material expanding Barrett Engineering Steel Irelands stock range and reinforcing our commitment to the Irish market.
- State-of-the-art **Amada PCSAW 430AX** at our Midlands site, an incredibly versatile saw for a wide range of grades and diameters.
- **Amada PC330** bandsaw installed and reducing processing times at our North West depot.
- Stocking of EN30B (835M30) in diameters ranging from 38mm to 210mm to supply demand across the division.
