

YOUR TRUSTED PARTNER FOR A LOW CARBON STEEL FUTURE

BARRETTSTEEL.COM

Barrett Green Steel Reporting Solution helps Designers and Structural Fabricators bring sustainable buildings to life by ensuring Low Embodied Carbon Steel Supply and Reporting is stress free.

Barrett Green Solutions allows us to demonstrate compliance against meeting either an overall embodied Carbon Figure for the Steel frame Co2e/Sq.m OR confirm compliance on an Embodied Carbon Factor.

It's designed to keep different manufacturing routes open, giving designers maximum flexibility to meet Embodied Carbon targets, saving both time and cost, whilst the Construction industry strives for continuous improvement and ultimately net zero.

Requests for reductions in embodied carbon on steel superstructures will

become more frequent and our itemised Embodied Carbon reporting frees our clients to focus on fabrication.

Manually calculating this information requires training and is a time-consuming exercise. Even after training, it will ultimately increase demands on already stretched teams and add to incurred project costs.

Barrett Steel have used their expertise as leading trusted steel suppliers to anticipate this development, as organisations move towards net zero, by launching **Barrett Green Solutions** reporting and supply.

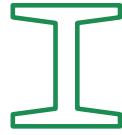

Available NOW – request GREEN SOLUTION REPORTING at time of enquiry.

Your Trusted Partner For A Low Carbon Steel Future

150+ Years of Innovation and Trusted Solutions

As the UK's leading steel stockholder, we have a history of investing and growing to support our customers changing needs.

Majority of Group Stock already EAF

Aside from large projects, we also offer Low Co2e steel direct from local depot network.

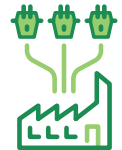

Barrett Steel Shoreham

Dedicated bulk receipts and processing site stocking only Low Embodied Carbon Steel ready for UK wide distribution.

Itemised Embodied Carbon Footprint

Embodied Carbon report for every individual steel item supplied.

Range of Manufacturers

EAF, BOS and EAF recycled and renewably produced available from stock to meet project timescales.

Accuracy not Averages - Mill Specific Verified EPD Data

Barrett Green Solutions will provide Mill Specific, independently verified EPD based data.

Carbon Reporting Automated and Easy

Barrett Green Solutions supports our customers so you can focus on fabrication.

Automated Reporting saves Time and Money

Remove potential risk of using incorrect EPD or industry average whilst saving time and project costs.

Measure, Manage & Reduce Co2e on the Road to Net Zero

Barrett Green Solutions supports the journey of continuous improvement towards net zero.

Life Cycle Scope A1-A3 Reporting

From Manufacture and Mill to Shipment and Arrival our reporting covers the four scopes for you.

°CLIMATE GROUP STEELZERO

Climate Group Steel Zero

Barrett Steel were the first UK stockholder to commit to procuring 100% net zero steel by 2050.
